

Handmade & Unique

Each design can be made to your requirements, each mould is handcarved and each panel is handcrafted - no two will ever be the same. Every piece has its own unique story and creates the perfect focal point in any room. Need inspiration? Let our artists & designers create the right piece for your interior.

What We Do

Fused Glass Design® was established to make art functional.

Whether it's a glass worktop in the kitchen, glass art in the living room or interior glass doors throughout the home, Fused Glass Design® - with the assistance of our carefully curated group of designers, artisans and installation specialists can help you create something truly special through the medium of fused glass.

Uncompromising
Quality

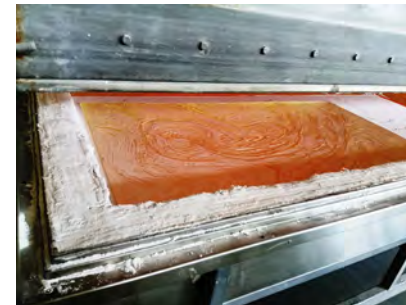

How We Do It

Handcarved Moulds

All of our glass products are handmade, the process begins with our artists sketching out your ideas and leads to our skilled artisans handcarving your glass mould.

Kilnformed Glass Panels

Heated to 820°C, red-hot glass is slumped onto the moulds. Temperature, time and gravity work together to set the glass into the form of the carvings.

Professional Installations

Over 15 years in the bespoke glass industry means you can trust us to fit your products perfectly everytime. We take care of all aspects from the start of your project to the end.
